

PDFForge Master Services Agreement

CONFIDENTIAL & PRIVILEGED DOCUMENT - VER 2.4

1. OVERVIEW & SCOPE OF SERVICES

This Master Agreement governs the deployment of client-side document processing technologies. PDFForge provides zero-server document editing, ensuring 100% privacy and local-only processing.

Key Project Milestones & Deliverables:

- Vector & text annotations with high-precision rendering
- Digital signature validation and multi-style drawing pad
- Non-destructive page reordering, splitting, and merging
- Instant client-side download without cloud round-trip

2. AUTHORIZATION & SIGNATURES

Please review and sign in the designated boxes below using PDFForge signature tool.

Page 2: Technical Specifications & Privacy Audit

A. BROWSER SECURITY ARCHITECTURE

All cryptographic rendering and canvas calculations run strictly in client memory.

No bytes are sent across the public network unless the user explicitly triggers cloud sync.

B. TESTING INSTRUCTIONS

1. Try selecting the Highlight tool and highlighting these lines.
2. Add a shape or freehand sketch to test vector layers.
3. Add your signature in the page 1 signature area.
4. Click Download PDF to verify the clean output PDF.
